AcroTeX.Net

The \texttt{rmannot} Package
Demo of MP3 Player

D. P. Story
The Tardis of Dr. Who

Above is the basic appearance of the MP3 file, basically, just the control bar.

On the next page is a fancy version, obtained by using a graphic background.
Currently, a rich media annotation has not hidden property, you can, however, move it off the page and control the play using a form button or link action.

Here are examples: A form field or a link play the tardis!

The verbatim listing is given below.

Using the above techniques, you can also place a link around, for example, a graphic that plays the MP3 when clicked. See the demo file tst_flv_asjs.tex for a discussion of using Acrobat JavaScript to play a rich media clip.
