**The rmannot Package
SWF with Resources**

D. P. Story

AcroF_oX

Demo Graphing

D. P. Story

We use `mySkin` as the primary SWF, and include `mySWF` in the list of resources, using the `resources` key.

```
\rmAnnot[poster=afldemoposter,transparentBG,  
resources={mySWF}]{537bp}{530bp}{mySkin}
```

The skin is the control bar at the bottom, which is fully functional. We also include a custom poster, and specify `transparentBG`.
