# 1. Introduction

This is an introduction.

## 2. Target Page

This is a page in the sample file. It is the target of many links in the file `links.pdf`.

Let me place a destination right here:

```
\special{ps:: %  
[ /Dest /Target  
  /DEST pdfmark}
```

Here is another mark with a `/View [ /Fit ]` attached.

```
\special{ps:: %  
[ /Dest /TargetwithFit  
  /View [ /Fit ]  
  /DEST pdfmark}
```

## Y&Y Destination Page

Put a special Y&Y mark here: `\special{mark: GetYandY}`

This mark will be recognized by [Dviwindo](#), and will be recognized by the [Acrobat Reader](#) after you [Distill](#) using [Dvipson](#).
