

---

The assignment is due on Wednesday, August 28.

---

- Read all of Chapter 13 quickly to get an overview, and then go back and read carefully up to page 455. Pay special attention to the terms in boldface type and to the three case studies. (You might find the overview on page 465 helpful.)
- Do Chapter 13 Problems 9–12, 13–16, 41.
- On a separate sheet of paper, write up the example you came up with in class for describing a population: (A) Define the population; (B) State your objective; (C) Explain your method for gathering data. Remember, this discussion must be on a separate sheet of paper from your homework in order for you to receive credit for it. If you are submitting the same example as your class partner, put your partner's name on the paper in addition to your own.
- If you have a questions about the homework, contact me and/or *write up your question to hand in at the beginning of class on Wednesday*. (Use a separate sheet of paper.)
