Instructions: After thinking about this for a little time, we will discuss the problem as a group. You will then write up your own paper.

Imagine that you have a friend or family member who is about to enter high school, and intends to go to higher education. Write a letter of 1 or 2 pages, giving them advice on their study of mathematics and science.

Task Description: The paper should be type-written, correctly spelled, and have appropriate grammar. Your argument should be reasoned. As usual, cite any references used, including web sources.
