Career seminar for STEM students

NASA Research: A Sampling of Current Projects at NASA Glenn Research Center

Four scientists from NASA Glenn Research center in Cleveland will visit and share about their research and working at NASA. Find out about projects the areas of:

Materials Research - Michael J. Kulis
- Chemistry in Extreme Environments

Combustion Science - Michael C. Hicks
- International Space Station (ISS) Experiments

Aerosol Science - Marit E. Meyer
- Fire Detection and Ambient Air Quality in Spacecraft

Gas and Fluid Systems - Lauren M. Best
- Fluid and Cryogenic Design for In-space Propulsion Stages

Information on internships and other student programs at NASA will be presented. A question and answer session will follow, including opportunities to speak one-on-one with researchers.

The seminar will take place on Thursday February 5th from 3:00pm till 4:00 pm in College of Art and Sciences Building room 142.
