1. Independent decisions, so multiply options.

\[ 2 \times 3 \times 4 = 24 \]

Decision tree with 24 final leaves:
- Size
- Crust
- Topping

2. Dependent decisions: cheese-stuffed crust is large only!

First way:
- Crust
- Size
- Topping

20 leaves

Second way: Two cases:
- Large
- Small

\[ 3 \times 4 = 12 \]
\[ 2 \times 4 = 8 \]

12 + 8 = 20
