Tentative Course Outline
We will explore some of the major theorems and ideas in mathematical analysis.

Course Policy

1. Incompletes will only be given in documentable cases of long-term illness, or similar problems. In addition, at least half of the semester’s work must have been completed, with at least an average grade of C. College policy also states that a student may not sit in on the course the next semester to make up the incomplete, but only to make up the missed work.

2. Grades will be based on class participation and homework, which will include written assignments, proofs, and applications.

3. All University Rules and Regulations are in effect, including those on attendance, discipline, academic honesty and harassment. Included under these policies are those on disruption, which means that you should turn off cell phones and beepers while in class.
